August 4 - August 9

MATERIALS LIST

You can come to this class with nothing but a pair of scissors and make things, or you can bring an assortment of materials and tools that you imagine could be helpful in combination with the found materials to build structures and transform things like cardboard and rope into new constructions.

I will bring an assortment of useful tools and support materials that the class can share, and the other things you might decide you want can be obtained at the local hardware stores.

If you do want to bring things that come to mind in reading the class description, please do so.

Here are some suggestions of things you could bring: yarn, string, cord, thread, beads, wire, hardware, jewelry findings, chain, old jewelry, etc.
